PROVIDING QUALITY VA HEALTH CARE TO VETERANS

in Florida, South Georgia, Puerto Rico & the U.S. Virgin Islands
From the Network Director:

With nearly a second year of COVID-19 behind us, we continue to meet the ever-changing challenges of this pandemic with perseverance, dedication, and innovation to best serve our nation’s heroes.

In the past year, care provided to Veterans and their families continued to show significant growth from pre-pandemic levels. In the past two years, virtual care appointments have grown over 1,200 percent, providing safe and convenient access to high-quality care. With effective safety protocols in place, VISN 8 hospitals and clinics remained open, even during pandemic peaks that produced large increases in severe illness and hospitalization. Our facilities quickly responded to care for patients. We completed nearly 9.9 million outpatients visits, a 16 percent increase from 2020, and a nearly 10 percent increase in the number of Veterans using services at our facilities.

As soon as COVID-19 vaccines were available, we began providing hundreds of thousands of vaccines to Veterans, their families, and our employees. Today, these efforts continue with booster shots as the best protection against COVID-19.

Throughout the many COVID-19 related challenges, we opened three new and improved facilities, with ten more planned across our network in 2022 and beyond. These facilities offer Veterans and their families greater access to a wide range of primary and specialty care, mental health, women’s health, telehealth services, and more.

Although our challenges have been many, more Veterans than ever before are coming to our facilities for care and most report high levels of satisfaction and trust. In fact, nearly 91 percent of patients surveyed said they trust VISN 8 facilities for their medical and mental health needs. We will continue to work hard to build and maintain that trust.

To close, thank you to all staff, volunteers, and partners for your ongoing commitment in providing high quality, lifelong care to Veterans and their families.

With sincere gratitude,

Miguel H. LaPuz, M.D., MBA
Director, VA Sunshine Healthcare Network (VISN 8)

There are more than 2 million women Veterans living in the U.S. today. Florida has the second highest number of women Veterans in the nation, about 150,000, only behind Texas with a little more than 185,000. Women are the fastest growing group in the Veteran population. In 2000, women were only 4 percent of the Veteran population. By 2040, women will be 18 percent of the Veteran population. Today’s women Veterans are the best-educated and most diverse generation. They are generally younger than male Veterans and will have many opportunities to receive VA care.

VISN 8 is Here for America’s Veterans

Nearly two years ago, as the world began experiencing the worst pandemic in modern times, VISN 8 responded swiftly to meet the needs of Veteran patients in an ever evolving and challenging environment.

VA health care facilities took immediate steps to mitigate infection and spread of COVID-19 while ensuring the safety of Veterans, their loved ones, and employees. Entry screening areas were set up at all our facilities. Modifications were made in waiting rooms and other areas to ensure social distancing. Stringent and enhanced cleaning and disinfection practices were put in place, and thousands of new employees were hired specifically to help manage COVID-19 operations.

VA’s investment in the technology and digital infrastructure to support virtual care well before the pandemic is a big reason VISN 8 facilities were able to quickly adapt and convert many in-person appointments to virtual visits. Telephone visits, VA Video Connect, VA Health Chat, My HealtheVet and other virtual care delivery methods were all used to ensure there was no interruption in care. Since 2019, prior to the pandemic, VISN 8 facilities collectively increased the use of virtual care by 1,280 percent.

The Clinical Contact Center (1-877-741-3400), which functions as a 24/7 virtual urgent care service, became the “first line of defense” triaging Veterans in a virtual environment for COVID-19 while also providing immediate and convenient care to Veterans. In 2020 and 2021, the center handled more than 2.5 million calls with a 78 percent provider first contact resolution rate of successfully addressing a Veteran’s reason for calling at their first contact.

When much of the state, including community health systems, were shut down or services curtailed, VISN 8 hospitals and clinics remained open including same day appointments, urgent care, and more. In 2021 alone, our facilities completed nearly 9.9 million outpatient visits – a 10 percent increase compared to 2019 and a 16 percent increase compared to 2020. Although we did experience some challenges referring patients to community health care facilities due to closures or limitation of services, referral numbers increased or remained stable year over year.

In December 2020, we saw promising COVID-19 vaccines roll out and we quickly began vaccinating hundreds of thousands of Veterans, their loved ones, and our employees. We continue these efforts today by providing booster shots to Veterans, their spouses, and caregivers as we know vaccination is the best protection against this persistent virus.

Just as we were beginning to see a light at the end of the tunnel in June 2021, the Delta variant wreaked havoc on the nation’s health systems and especially in Florida. Significant increases in severe illness and hospitalizations required VISN 8 facilities to realign many staff to care for very sick patients.

As part of VA’s fourth mission to provide support during national disasters, VA facilities in Florida accepted COVID-19 patient transfers from small rural community hospitals that were overrun. In the early days of the pandemic from April to September 2020, more than 200 VA employees provided critical support to 82 community nursing homes, saving lives and mitigating COVID-19 spread and infection.

Today, we face yet another variant of the virus called Omicron and anticipate increases in infection again. Whatever the variant or challenge, VISN 8 facilities and employees are ready and have demonstrated perseverance, innovation, and true commitment to the most noble mission in health care. The 680,000 Veterans we care for at our facilities have taken notice as nearly 91 percent indicate they trust VA for their care and more Veterans are coming to us than ever before.

What the world will look like in the coming months and years ahead as we continue to manage health care operations is uncertain. However, one thing will remain constant: our enduring commitment to providing lifelong care to our nation’s heroes where and when they need it. As we continue to fight this pandemic, we encourage all eligible Veterans to contact their nearest VA facility to learn how VA is making it easier and safer than before to receive the health care they need.
The Bay Pines VA Healthcare System provides level 1a, tertiary care and is headquartered in Bay Pines, Florida. Opened in 1933, the C. W. Bill Young VA Medical Center is situated on 337 acres on the Gulf of Mexico approximately eight miles northwest of downtown Saint Petersburg. Co-located on the medical center campus is the Veterans Benefits Administration’s St. Petersburg Regional Office and the Bay Pines National Cemetery. An ambulatory surgery center which provides same-day surgery, endoscopy, and other ancillary services located in Cape Coral. In addition to the main hospital and ambulatory surgical center, the healthcare system operates seven outpatient clinics in the cities of Bradenton, Naples, Palm Harbor, Port Charlotte, Sarasota, St. Petersburg, and Sebring. The healthcare system provides a full range of high quality medical, surgical, psychiatric, and extended-care services in outpatient, inpatient, residential, nursing home/community living center, and home care settings for Veterans residing in 10 counties in central, southwest Florida ranging from Pinellas County in the north to Collier County in the south.

Leading the COVID-19 Vaccination Effort

Consistently among the top five healthcare systems across the VA in the number of COVID-19 vaccinations administered throughout the pandemic, the Bay Pines VA Healthcare System administered more than 120,000 vaccines from December 2020 through July 2021. Within hours of receiving the first shipment of vaccine, Veterans and staff members in the Community Living Center became among the first in the state to become vaccinated against the virus. In the months that followed, the facility held more than 100 community outreach events to bring the vaccine closer to where Veterans and their families lived and worked. Shown here, Dylan Sands received the 100K COVID-19 vaccine at the C.W. Bill Young VA Medical Center in July 2021.

Advancing Cancer Care and Research Across the VA

The Bay Pines VA Healthcare System took steps toward improving cancer care for Veterans in central and western Florida through the implementation of two unique and complimentary initiatives: the establishment of a VISN 8 Lung Precision Oncology Program and the negotiation of a main membership agreement with NRG Oncology. In March 2021, our healthcare system was selected as a spoke site in the establishment of a Lung Precision Oncology Program, a VA Office of Research and Development funded network, to promote increased access to lung cancer screening and lung cancer precision oncology clinical trials. The program is a collaborative effort between the Miami VA Healthcare System, James A. Haley Veterans’ Hospital, and the Moffitt Cancer Center. The main membership agreement with the NRG Oncology was established in July 2021 to advance the long-term goal of increasing access to ground-breaking clinical research trials for Veterans diagnosed with cancer. This agreement was the first of its kind between VA and NRG Oncology. NRG Oncology brings together the National Surgical Adjuvant Breast and Bowel Project (NSABP), the Radiation Therapy Oncology Group (RTOG), and the Gynecologic Oncology Group (GOG)—each recognized internationally as a research leader.

Partnering with the Community to Vaccinate Veterans and Their Loved Ones

Bay Pines VA staff members pose for a photo at a Clearwater Threshers game in between administering COVID-19 vaccinations to Veterans and their loved ones. Bay Pines Incident Command members and health care providers held more than 100 outreach events throughout the pandemic. These vaccination events ranged in locations from monthly Veteran service organization meetings to community fun runs and sporting events in hopes of making the COVID-19 vaccine as accessible as possible.

Community Partnerships Advance Health and Well-Being of Veterans

The Bay Pines VA Healthcare System, the Community Veteran Engagement Board, and Feeding America established a partnership to end food insecurity and educate Veterans and their families about healthy eating. This partnership provides food, health and wellness classes, and transportation for Veterans who sign up through Feeding America Tampa Bay. Shown here, the collaborative team poses for a photo after distributing more than 500 boxes of food.
The James A. Haley Veterans’ Hospital (JAHVH) is a tertiary care facility classified as a Clinical Referral Level 1 Facility. JAHVH is a teaching hospital, providing a full range of patient care services, with state-of-the-art technology as well as education and research. As one of the largest VA teaching facilities, JAHVH is affiliated with the University of South Florida and currently 131 additional active affiliations and 200+ resident slots. In 2018, JAHVH trained over 1,500 trainees including medical students, residents, and fellows. The 499-operating bed medical center includes hospital med-surgical, acute psychiatry, nursing home/community living center, hospice and palliative care, spinal cord injury, polytrauma center, pain/rehab along with multiple outpatient primary and specialty care services. JAHVH also operates a primary care annex near the main hospital and four community clinics all offering primary and mental health care located in New Port Richey, Brooksville, Lakeland, and Zephyrhills. JAHVH also operates a new multi-specialty outpatient clinic in south Hillsborough county that opened in May 2019.

Virtual Care to Keep Veterans Safe

In the face of the current public health emergency of COVID-19, James A. Haley Veterans’ Hospital rapidly transitioned primary care and mental health services from facility-based care to safer virtual alternatives. Virtual care has been pushed to the forefront during this health crisis and will remain an important modality going forward. All clinical services at the facility, including specialty care services, are utilizing VA Video Connect (VVC) – a secure video chat application that allows Veterans to connect with their providers from any web-ready device. The hospital is ranked in the top five for VVC workload among VA facilities in the nation for speech, audiology, medicine, physical medicine and research, spinal cord injury, surgery, and compensation and pension.

Validating Service and Quality through Accreditation

The James A. Haley Veterans’ Hospital always strives for excellence, maintaining three Joint Commission Programs and Commission on Accreditation of Rehabilitation Facilities programs, (or CARF International). CARF International is an independent body that establishes standards for accreditation in care. Being awarded CARF accreditation means the hospital not only passed an in-depth review but also met rigorous international guidelines for service and quality. This year, the facility received four program accreditations, representing 19 areas of service in physical medicine and rehabilitation services, mental health services, spinal cord injury program, and employment and community service programs. There were 12 physical medicine and rehabilitation programs awarded CARF accreditation, more than any other rehabilitation program in the Veterans Health Administration (VHA).

Leading the Charge with COVID-19 Vaccines

The James A. Haley Veterans’ Hospital was one of the first VA sites to begin administering the Pfizer COVID-19 vaccine. Vaccinations for vulnerable Veterans and employees began in late December 2020. The hospital’s vaccination team has coordinated and administered over 120,000 COVID-19 vaccine doses to Veterans, caregivers, and employees. In March 2021, the hospital partnered with the Florida Department of Health and Hillsborough County to significantly expand COVID-19 vaccine availability through a formal FEMA mission assignment. This became the first and largest VA-supported vaccination site in the nation with the capacity to vaccinate approximately 3,000 citizens per day. The vaccination team provided nearly 40,000 doses of vaccine to the local community.

Virtual Care Connect, VA Health Chat, the Clinical Contact Center and other virtual care modalities provided Veterans with computer-mediated care and access to VA clinicians whenever and wherever they were, bridging the face-to-face gap during the pandemic.

Next Generation Mobility

The James A. Haley Veteran’s Hospital Spinal Cord Center was one of twenty-five VA locations to receive the next generation mobility device—the iBOT personal mobility device from Mobius Mobility, LLC through VAS New England Center for Innovation Excellence (NECIE). The iBOT looks like a wheelchair, but it’s so much more. Veterans can climb stairs independently, traverse rough outdoor terrain and even transition themselves to eye level with others.

"The VA that I grew up around in the 80s and 90s - bureaucratic, institutionalized, environment, long wait times - is vastly different than the VA I work in today. Our front-line experts are empowered to be innovative in continually improving their processes for our Veterans. Adding to that a humble servant leadership approach is why I choose VA as an employee! As the son/grandson of Veterans who use the VA for their care, I say to my fellow coworkers, THANK YOU for all that you do each day!"

- Chad Canode, Chief, Systems Redesign, James A. Haley Veterans’ Hospital and Clinics
The Miami VA Healthcare System is a Joint Commission accredited, complexity level 1A facility serving approximately 63,000 Veterans in three South Florida counties: Miami-Dade, Broward, and Monroe. The Bruce W. Carter VA Medical Center is in downtown Miami and supports two major satellite outpatient clinics located in Sunrise and Key West, and five community-based outpatient clinics located in Homestead, Key Largo, Pembroke Pines, Hollywood, and Deerfield Beach. The facility provides general medical, surgical, and psychiatric services, as well as serving as an AIDS/HIV Center, Prosthetic Treatment Center, Spinal Cord Injury Rehabilitative Center and Geriatric Research, Education and Clinical Center. A Healthcare for Homeless Veterans Clinic is located about one mile from the medical center. The organization is recognized as a Center of Excellence in Spinal Cord Injury Research, Substance Abuse Treatment, and a Chest Pain Center. In addition to medical services, the healthcare system’s Research Program conducts nearly $8 million in research in areas of oncology, PTSD, endocrinology, mental health, diabetes, hypertension, and other medical fields.

Delivering the Best Care

Primary Care Services at the Miami VA Healthcare System were ranked #1 among all level 1a VA health care facilities (the largest and most complex medical centers), along with general surgery and endocrine services. As a key part of ensuring Veterans get the care they need when they need it, Miami VA Primary Care is responsible for managing care for Veterans and coordinating specialty and mental health services as needed. Even more impressive was the growth in Veterans using primary care services at the Miami VA, exceeding 2020’s number of encounters by 8 percent.

Using Technology to Deliver Safe Care to Veterans

Virtual Care options across VA have dramatically increased during the COVID-19 pandemic and the Miami VA continues to be a leader in using video on demand technology to ensure Veterans continue to have access to their providers. This includes a dramatic increase in the use of MyHealtheVet – an online portal for Veterans to check their health records and send secure messages with their providers. Miami VA saw a 23 percent growth in the use of secure messages from 2020 to 2021, with more than 97.5 percent of them responded to within 72 hours.

Leaders in Veterans Trust

The Miami VA Healthcare System continues to be a leader in earning the trust of Veterans, with 91 percent of Veterans surveyed saying they trust the facility and staff with their health care. In 2021, nearly 63,000 Veterans chose the Miami VA for their health care needs – the most patients the healthcare system has ever seen while maintaining its status as one of the top sites in the country for access to care.

Bringing the COVID-19 Vaccine Close to Where Veterans Live and Work

Serving a geographically diverse area like South Florida means bringing services to Veterans wherever they are. From partnering with Vet Centers in suburban communities, expanded vaccination clinics in our downtown locations, partnering with local businesses, Veteran Services Organizations and non-profits or even holding the southern-most VA vaccine event in the country in Key West – the Miami VA is committed to bringing the services Veterans need to the communities they live in.

Motorcycles, Veterans and Vaccines – the Miami VA and Petersons Harley-Davidson spent a great day filled with music, custom motorcycles, food trucks, and COVID-19 vaccines!

In one day, the Miami VA was able to vaccinate more than 440 Veterans living in the beautiful Florida Keys! Hosted by the College of the Florida Keys, this special one-day event brought hundreds of vaccinations to Veterans living throughout Monroe County – even some who were traveling to the southernmost point in the United States!
The North Florida/South Georgia Veterans Health System is level 1a, tertiary care facility headquartered in Gainesville, Fla. The organization spans about 50 counties in Florida and South Georgia and is the largest VA healthcare system in the country in terms of patients served. The system operates 14 sites of care including two medical centers located in Gainesville and Lake City; three multi-specialty outpatient clinics located in Jacksonville, The Villages, and Tallahassee; and nine community-based outpatient clinics located in Palatka, Ocala, St. Augustine, Marianna, Middleburg and Perry, Florida and Valdosta, Waycross and St. Marys, Ga. The organization also operates two Community Living Centers at the medical centers located in Gainesville and Lake City.

Improving Healthcare Outcomes with Nursing Care

The American Association of Critical-Care Nurses recognized nurses on the medical surgical unit at the Malcolm Randall VA Medical Center in Gainesville, Fla. with a gold-level Beacon Award for Excellence. This award recognizes unit caregivers who successfully improve patient outcomes and align practices with AACN's six Healthy Work Environment Standards. These standards signify an effective and systematic approach to policies, procedures, and processes that include engagement of staff and key stakeholders; fact-based evaluation strategies for continuous process improvement; and performance measures that meet or exceed benchmarks.

Lake City Celebrates 100 Years of Serving Veterans

The North Florida/South Georgia Veterans Health System celebrated a century of service at the Lake City VA Medical Center by burying a time capsule. What is now the medical center was the original site of the Florida Agricultural College. In 1920, the site was purchased by the U.S. government and after extensive renovations, the first patient was admitted on December 6, 1920. It was named the U.S. Public Health Service Hospital No. 63. On August 9, 1921, the Veterans Bureau was created to care for returning World War I Veterans, and the transition from Public Health to the Veterans Bureau Hospital began. This transition was completed in 1924 when the Lake City VA Hospital began its proud tradition of caring for the nation’s Veterans. The Lake City VA Hospital officially became the Lake City VA Medical Center in 1978. To commemorate the milestone, with help from employees, a time capsule with present day items was assembled and buried for future descents to enjoy no earlier than December 6, 2120. The hospital continues to leave a significant mark on the Lake City community and the North Florida/South Georgia Veterans Health System.

A Leader in Quality and Patient Satisfaction

In 2021, the North Florida/South Georgia Veterans Health System received a 4 out of 5 patient safety star rating via Hospital Compare. Hospital Compare, also known as Care Compare, is a program managed by the U.S. Centers for Medicare and Medicaid Services. This program publicly reports hospital performance information online. Transparent public reporting helps Veterans choose where they go to receive their care. Veterans overwhelmingly choose the North Florida/South Georgia Veterans Health System for their care as demonstrated by Veteran feedback, exceptional quality ratings, and patient growth.

COVID-19 Vaccine Outreach

The St. Augustine Community Based Outpatient Clinic and the Veterans of Foreign War (VFW) Post 2391 located in St. Augustine, Fla. collaborated to offer COVID-19 vaccination services to eligible Veterans. The partnership with VFW Post 2391 allowed clinic staff to provide vaccines in a convenient offsite location close to where Veterans live and work. More than 200 vaccines were delivered to Veterans and their loved ones because of the partnership.

A team from the Malcom Randall and Lake City VA Medical Centers traveled to Thomasville, Ga. to provide COVID-19 vaccines to Veterans. The convenience of the offsite location at Thomas University allowed Veterans to receive the vaccine close to their home without the need to drive to one of the health system’s community-based outpatient clinics or hospitals. A similar event was held in Perry, Fla. at the Perry Elks Lodge #1851. Between the two events, more than 130 vaccines were administered.
Officially established in October 2006, the Orlando VA Healthcare System (VAHCS) was designated as a 1a facility in 2021, serving more than 138,000 Veterans in Central Florida and includes a 120-bed Community Living Center, two Mental Health Residential Rehabilitation Treatment Programs/Domiciliaries (60 beds located at the Lake Nona Campus and 58 beds at the Lake Baldwin Campus), one Health Care Center in Viera, a medical center in Orlando (Lake Baldwin campus), a Multispecialty Community Based Outpatient Clinic in Daytona Beach, and five Community-Based Outpatient Clinics located in Clermont, Kissimmee, Deltona, Palm Bay, and Tavares. The Orlando VA Medical Center at Lake Nona provides outpatient, inpatient and emergency services. Orlando’s 65-acre medical campus encompasses 134 acute inpatient beds, providing complex medical/surgical/mental health specialty care, advanced diagnostic services, and a large multispecialty outpatient clinic.

“I had my reservations upon my separation from the service to connect with the VA,” said Chavez Jr. “I can say at this point that those reservations have subsided, and the VA has had a considerable positive impact in my life.”

– Eladio Chavez Jr., U.S. Marine Corps Veteran, discovered the therapeutic benefits of golf thanks to the Orlando VA’s Recreation Therapy Program partnership with PGA Tour.

VA Secretary Joins Annual Pride Celebration

Pride could be seen from miles away as the flag waved high at the Orlando Vet Center and Orlando VA Healthcare System’s 11th Annual Pride Celebration. Community partners and VA staff provided information for LGBTQ+ Veterans and attendees were entertained by the Orlando Gay Choir. A special guest was in attendance this year, the Honorable VA Secretary Denis McDonough, who personally thanked each COVID-19 Vaccine team member, and even stepped behind the VA resource tables to share information with Veterans and the community about the VA Mission. During this event Secretary McDonough announced the VA will offer gender confirmation surgery to transgender Veterans. The heartfelt care for LGBTQ+ Veterans was felt by all who attended the event as well as the commitment to serve every Veteran.

Mobile ICU Supports Operations During Summer COVID-19 Surge

As part of our surge plan, the Orlando VA Medical Center, along with the Veterans Health Administration (VHA) Office of Emergency Management (OEM), deployed a Mobile Intensive Care Unit (Mobile ICU) to support hospital operations for non-COVID-19 and COVID-19 inpatient requirements. VHA has long been a leader in disaster response. The Mobile ICU, part of VA’s impressive deployable asset inventory, is designed for operational speed and flexibility.

This Mobile ICU allowed the Orlando VA to continue to provide necessary care to inpatients during this surge of Veteran hospitalizations while taking some infrastructure pressure off the hospital, such as oxygen and water. The unit is fully self-contained and self-supported with its own oxygen generation capability and potable water system.

The Mobile ICU components were delivered on Friday, August 20. Over the course of a week, contractors made all necessary connections and tested systems. Once turned over to the Orlando VA, staff installed additional equipment for patient care and ran several simulations and training involving staff from multiple disciplines and began providing patient care on August 31. A total of 10 patients were cared for in the unit before being decommissioned on September 22.

Marriage and Family Therapist Wins Dr. Robert L. Jesse Award

Melissa Tran received the Dr. Robert L. Jesse Award for Excellence in InnoVAtion for her innovative program called Perinatal Reproductive Education and Planning Resources, or PREPARe. PREPARe provides a holistic prenatal and postnatal support program involving nutrition, mental health, and women’s health. Offerings range from yoga, hypnosis and childbirth, lactation counseling, parenting styles, infant loss, infertility, post-partum depression, effective communication, and how personal health affects children including nutrition and food safety. This award recognizes and honors VA employees who have demonstrated excellence and enabled the discovery and spread of health care innovation that exceeds expectations, restores hope, and builds trust.
The VA Caribbean Healthcare System is a Joint Commission accredited, complexity level 1A facility serving Veterans in Puerto Rico and the U.S. Virgin Islands. The healthcare system consists of a tertiary care VA Medical Center located in San Juan, Puerto Rico and ten outpatient clinics located in Arecibo, Ceiba, Comerio, Guayama, Mayaguez, Ponce, Utuado, Vieques, St. Croix, and St. Thomas. The San Juan VA Medical Center includes multidisciplinary ambulatory facilities and 280 operational acute care beds including 12 blind rehabilitation beds and 122 operational nursing home beds.

Renovating and Upgrading to Deliver State-of-the-Art Care

In February 2021, the VA Caribbean Healthcare System completed a large renovation of the Acute Behavioral Health In-Patient Care Unit as part of a 26,460 square foot construction project to modernize and upgrade existing spaces and adding services for Veterans. The unit is designed to provide high-intensity mental health services for Veterans with acute and severe emotional and behavioral symptoms.

Community Living Center Earns 5-Star Rating

The San Juan VA Community Living Center (CLC) again achieved an overall 5-star rating from the Centers for Medicare and Medicaid Services. Healthcare System leaders credited the sustained achievement to the many dedicated CLC staff, which include nurses, physicians, physical therapists and occupational therapists, recreational therapists, pharmacist, social workers, dieticians, health administration staff, housekeepers, and more. The mission of the San Juan VA’s CLC is to restore each Veteran to his or her highest level of well-being. It is also to prevent declines in health and to provide comfort at the end of life.

Improving Transportation in the U.S. Virgin Islands

In August 2021, the VA Caribbean Healthcare System established a charter flight program for Veterans in the U.S. Virgin Islands (USVI). The program, established in collaboration with USVI Office of Veterans Affairs, offers eligible Veterans a chartered flight service from the USVI to Puerto Rico when Veterans require specialty care services not offered at the VA clinics located in St. Thomas and St. Croix. The flight provides direct service from the islands to Isla Verde International Airport, departing from Cyril E. King Airport in St. Thomas, and the Henry E. Rohlsen Airport in St. Croix. The plane can carry nine passengers with the capacity to accommodate patients in wheelchairs and with oxygen needs. There are up to four flights per week, depending on demand.

In 2021, the VA Caribbean Veterans Healthcare System conducted hundreds of COVID-19 vaccine outreach events across Puerto Rico and the U.S. Virgin Islands to ensure Veterans living in rural areas had appropriate access to the vaccine. Pictured here is one of the healthcare system’s vaccination teams preparing to fly from San Juan, Puerto Rico to the island of St. Croix.

Carlos R. Escobar, Executive Director of the VA Caribbean Healthcare System, welcomes U.S. Virgin Islands Gov. Albert Bryan Jr. and his staff to the VA medical center in San Juan in August 2021. The purpose of the visit was to further develop alliances with U.S. territory leaders and discuss ways to better serve Veterans.

ANNUAL REPORT 2021 » www.visn8.va.gov
The West Palm Beach VA Medical Center opened in 1995 and is a general medical and surgical facility, providing a full range of patient care services, as well as comprehensive medical education and residency programs. All-inclusive health care is provided through primary care, emergency care, and long-term care in the areas of medicine, surgery, mental health, physical medicine and rehabilitation, radiology, telemedicine, dentistry, hemodialysis, comprehensive cancer care, and geriatrics. The medical center provides health care services to Veterans throughout South Florida and the Treasure Coast at its main facility in West Palm Beach and six contractor-operated community-based outpatient clinics in Boca Raton, Delray Beach, Fort Pierce, Okeechobee, Stuart, and Vero Beach. The facility also operates a 13-bed Blind Rehabilitation Service, which is the referral center for blind and visually impaired Veterans throughout the state of Florida. The facility also operates a Post-Combat Trauma Clinic with expanded services in Port St. Lucie.

Be the One Challenge

The voice of Veterans holds a power like no other. In partnership with the West Palm Beach VA, local Veterans joined forces to challenge their fellow brothers and sisters to help fight against the COVID-19 pandemic by ‘being the one.’ Be the One reminds Veterans, team members, and the community that it takes a simple act to get the COVID-19 vaccine to make a difference and bring an end to the pandemic. U.S. Army Veteran Jeff Michael said it best – “Do your part and be the American hero that you are, be the one to end this pandemic.”

Scan the QR code below to watch the campaign video.

Taking the COVID-19 Vaccine Mission on the Road

Meeting Veterans where they are to stop COVID-19 has been a vital local mission. The West Palm Beach VA COVID-19 Vaccine team filled up their gas tanks and got wheels rolling to make a difference. From Vero Beach to Fort Pierce, the West Palm Beach VA showed up to offer COVID-19 vaccine to all eligible individuals. The West Palm Beach VA made appearances at various colleges, local community centers, and the smaller, rural towns to make it easy and convenient to receive the vaccine.

Reaching Out and Caring for the Most Vulnerable

The Mobile Medical Homeless Outreach Event was a collaboration between Nursing, Social Work/Homeless Programs, MAS, Pharmacy, Emergency Management, and the Emergency Department to bring medical care and social work services to 50 Veterans staying at a West Palm Beach motel funded by the Supportive Services for Veteran Families (SSVF) provider Faith, Hope, Love, Charity, Inc. The goal was to provide instant triage, medical care, vaccinations, and social work assessments and referrals in rapid succession with administrative support to enroll and provide first/next appointments with primary care.

Service to the Community

Feet in the sand and gloves on hands – The West Palm Beach VA team proudly served beyond their service to Veterans. For employees, service does not stop at the end of the workday, it only continues. Dressed in red VA shirts paired with a smile and energy of excitement to better the place they call home, otherwise known as Juno Beach, employees joined the Loggerhead Marinelife Center to make a difference and clean up area beaches. The new partnership offers employees the chance to give back outside of their medical scrubs and professional suits.

“I have such love for West Palm Beach VA. I feel so grateful and blessed. The VA is shifting technology to help us out for the better, they are changing for the better to help us. I go out of my way to tell everyone how grateful I am for them. There are no words of how thankful I am for the West Palm Beach VA and what I would do for them.”

– Anthony Starace,
U.S. Army Veteran
